

Thank you for choosing Kellogg Pet Medical Center (KPMC). We are grateful for the opportunity to meet you and your pet's needs. I would like to take a little time to explain more about our clinic and the services we offer.

Kellogg Pet Medical Center is a full service veterinary clinic with a mission to provide you and your pet with exceptional, compassionate medical care and services. Our hours are Monday-Friday 8:00-5:30 and Saturdays from 8:00-12:00. We also provide after-hours emergency service.

Our clinic provides medical care for everything from routine preventative care to managing complicated medical and surgical cases. We have a surgery suite equipped with gas-anesthesia, patient monitoring equipment, and instruments for both general and orthopedic surgery. We have in-house blood diagnostic equipment but can also access two outside laboratories to offer even more testing options. The clinic is equipped with digital radiography to provide quicker more detailed images to aid in medical work-ups. KPMC has an onsite pharmacy to meet most of your pet's prescription needs but we can also utilize local pharmacies or national compounding pharmacies to make sure we get the right medication for your pet. Dental care for pets is often overlooked, but we offer two different ways to better care for your pet's teeth. We have traditional anesthetic dental cleanings which include digital radiography and extractions as needed. We also offer non-anesthetic dental cleanings for patients that meet the necessary criteria.

Preventative care is crucial for every pet. We recommend yearly examinations for younger patients and every 6 months for our older patients. Vaccinations are a very important part of your pet's health so we try to tailor vaccine recommendations to meet your pet's lifestyle. Parasite testing and preventative medications are strongly recommended and we have many options to fit your pet best. Make sure talk with us at your pet's regular visits to see what his/her needs are.

As a courtesy to our clients, we offer professional grooming by appointment and boarding for dogs and cats in a climate controlled environment with a fenced in walking area. Our retail section offers a wide selection of Science Diet pet foods which can meet a multitude of pet's needs from dental health to skin health. We have many toys, leashes, and collars to choose from as well. Make sure you take a look next time you are in.
